## Acknowledge

As we understand that the eProject is a step-by-step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. laddered approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knownledge in web developing world.

We also thank you so much for your infomation and the "demo" project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 03.

## **Synopsis**

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website is a digital marketplace that makes car buying and selling more efficient with abundant options for cars filtered by new, used, and brand names. More than that, users can find a suitable price for their car with available offers or make one. In addition to this, the website also provides good features for registration and facilitates time-consuming transactions.

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back *eprojects@aptech.ac.in* as the assigned schedule.

| Design Plan: CarBreezy    | Document Name: Problem Definition | SWD/Form No.01/PD/Ver1.0 |
|---------------------------|-----------------------------------|--------------------------|
| Effective Date:20-07-2002 | Version 1.0                       | Page No: 1 of 20         |

### **Problem Definition**

The portal will be designed as a single-page-application and responsive website with a set of pages and menus that represent the choice of activities to be performed. The pages, menus, and other visual elements must be designed in a visually appealing manner with attractive fonts, colors, and animations. All of these should also be laid out in a responsive manner

The Web site is to be created based on the following requirements.

- 1. The Top of the Page should be presented with a suitable logo and a banner with a depiction of cars on it.
- 2. The site must contain a menu with links to New, Used, Brands, Offers etc.
- 3. Sections should be created with a proper listing of cars under NEW, USED, BRANDS etc.
- 4. Clicking on any car should open a pop-up window with images of the car and a price along with tabs such as Internal Specification, External, Engine, Dimensions with details mentioned in these tabs.
- 5. Filter with options such as "Hatchbacks", "Sedan", "SUV", "Convertibles" etc, should be provided.
- 6. Section for various Offers should be provided with a list of available offers.
- 7. Gallery should be provided for viewing different images.
- 8. Site map, Gallery, about us, Queries link, Contact us link must be added.

| Effective Date:20-07-2002 | Version 1.0                       | Page No: 2 of 20         |

- 9. About Us and Contact Us: This menu option should show your email address, address, and phone number.
- 10. Color combination must be uniform throughout the project.
- 11. Navigation must be smooth.

Over and above this, the portal should implement the following functionalities:

- Display a continuous scrolling ticker at the bottom of the page with current date, time, and location (hint: Use geolocation features of HTML5).
- Display a visitor count at the top right corner of the page beside a logo image.
- The menu options should change color on hover and also after clicking.
- Fade in and fade out options can be used for the menus.

## **Customer Requirements Specifications**

### User:

### **Input:**

- Membership data registration
- Car information
- Car offer
- Contact messages

### **Process:**

- Validate membership data registration and save
- Look up car information(brand, model, state, style...)
- Validate offers form
- Validate contact form

### **Output:**

- Registration status
- Chosen car informations
- Car offer status
- Contact status

### Webmaster:

### **Input:**

- Webmaster login
- Action on car data
- Action on registered member

#### **Process:**

- Check webmaster login
- Delete/edit/add car data
- Delete/edit/add registered member data

### **Output:**

- Show webmaster state of login
- Show updated data

### **Hardware / software requirement:**

### **Software:**

Technologies to be used:

- Frontend: HTML5, CSS, Bootstrap, Javascript, jQuery, AngularJS

- Data Store: JSON files

### Other Requirements:

- Operating Portal: Windows

- Browsers: Edge, Chrome, Mozilla Firefox, Safari

- Server: XAMPP

#### Hardware:

- Intel Core i3/i5 Processor or higher

- 8 GB RAM or above

- Color SVGA

- 500 GB Hard Disk space

- Mouse

- Keyboard
